

March 22, 2006

Dear Environmental Quality Board,

As a lifetime resident of the Pittsburgh area, I have seen the air get very bad. Then with the end of the mills and the passage of the Clean Air Act, the air became much cleaner. However since then we now have millions of more cars and trucks in Pa. The quality of the air continues to go down. We have the means to improve this.

I would appreciate it if your Environmental Quality Board would support the DCP's proposed changes to the Pa. Clean Vehicle Program.

Sincerely

William R. Brinkhoff
