INDEPENDENT REGULATORY
REVIEW COMMISSION

Independent Regulatory Com.

We are a family who lives near Dimock &
would want to have new tough proposed regulations,
on gas drilling.

I don't think we have to go into detail as to
the harm that the gas industries have done to our
water & if regulations are not put into force immediately
it will be much more devastating to our aquatic life &
environment.

These companies are very rich & most certainly ^{can} afford
to keep clean our water. If they don't want to follow new
regulations, then put a stop to their drilling!!
Please get these regulations passed!

Margaret Schneider
