Email: amcginley2@verizon.net

Subject: Regulation 7-446

Message:

I've read through many of the comments, pro and con, on your site regarding the wastewater issue. Clean water throughout Pennsylvania is too important to defer until all the various claims are clarified and defined. Let's get this regulation on the books, now, as it stands and at least begin the process of cleaning up our water. US Steel's anxiety regarding the downside of passage and implementation are typical of the sort of stonewalling that can render any attempt at improving environmental quality moot. Please endorse the regulation as it now stands. Thank you.
