chapter 102, Erosion & Sedimentation

control IRRC #2783, EQB-
7-440

Dear Chairman Coccodrilli:

I am writing to ask your support of the above regulations which are designed to protect our right to clean rivers, streams, and drinking water.

While we desire to reap the economic benefits of gas drilling, we must now consider the potential negative impact on our shared environment - both now and in the future.

The buffer required is necessary, based on sound science, to prevent pollution due to stormwater runoff. We just need to allow (over, please)

nature to do its job, please protect
us, the citizens of Pennsylvania, as
well as future generations.

Sincerely,

BERNIE WILKE
Philadelphia.
