Subject: Proposed 25 PA Code, Chapter 96 – PA Bulletin February 13, 2010

Dear Hearing Board Members:

Lycoming County Water and Sewer Authority (LCWSA) has reviewed the proposed regulations - 25 Pennsylvania Code – Chapter 96 which appeared in the PA Bulletin on February 13, 2010.

LCWSA incorporates by reference the Pennsylvania Municipal Authorities Association (PMAA) comments and the County of Lycoming comments of the proposed Chapter 96 regulations submitted to the Environmental Hearing Board. We support the PMAA and Lycoming County comments in entirety.

The benefit of nutrient credit trading is the flexibility in meeting regulatory requirements and offers a strategy not previously afforded to the sewage treatment sector. It is imperative that the regulations - when adopted - truly offer the flexibility to meet regulatory requirements and provides incentives to both the point source and the non point source entities to encourage participation for cost effective credit trading.

LCWSA appreciates the Board's consideration of the Lycoming County & PMAA's comments, and our partner POTW comments to these regulations.

LCWSA is committed to promoting economic growth and development through infrastructure and offering creative solutions to our partner municipalities to meet their water and sewer needs.

Sincerely,

Christine Weigle
Executive Director
