**Subject:** drilling testimony

In light of the BP disaster I have grave concerns about the environmental impact from this new kind of drilling. I have seen the documentary and witnessed ordinary people lighting there tap water on fire. Although at first it seemed like a great way for landowners to make ends meet in this terrible economy. But now it seems that the very water we drink and air that we breathe are open to the highest bidder. After everything is polluted no amount of money will bring it back. Please keep our drinking water safe for the generations to come. We need to actively promote renewable, clean energy. Dodie Lovett, Dalmatia, Pa 570 495 2202
