Subject: Natural Gas

RECEIVED
IRRC

2010 JUL 27 A 9:31

When we used natural gas in the past, we just used it and did not worry about where it came from. Now it is our turn to supply gas, supplied by nature. Yes we have minimize the polluting of wells and to compensate those who have had pollution, but we are going try kill the industry by over taxing.

The state is making no attempt to trim the cost of the budget.
We are on a spending frenzy. We are like drug addicts.

We worry about the shale/water and we refuse to worry about the nitrites/nitrates in our hot dogs and deli meats. We don't care about the artificial colors, sweeteners, flavors, and the drugs we are forcing on people.

Penn could use this wind fall for good. but it will be wasted.

Most of our representatives think that if we can just create one more lottery or casino that our troubles will be over with.
Those things are a sign of a failed government. They are part of the problem.

If fact the lottery commission has no minimum income at which they would not recommend people buying lottery tickets.
So they are preying on the poor. Nice.. Real Nice.

Sincerely,
Joseph Rene DuPont
