

July 21, 2010

To whom it may concern -

I would like to add the following comments to those expressed at the Puckettville Area Middle School meeting on July 19.

I am not opposed to natural gas drilling.

We need this source of energy.

I do not find fault with anyone who leases their land for gas drilling.

I am upset with a state government -

all branches - which sets many lax rules and regulations for the industry.

I own a small ^{one} acre of land. If my water supply becomes unusable, I would be without a

place to live and very small chance of selling it. Please be fair to

everyone. Yes, allow gas drilling but make it safe.
