Subject: STOP THE DRILLING , PLEASE!!! Alastair Gordon

I am an editor and journalist (Wall St. Journal) and a local resident of the Delaware valley in PA and am shocked to hear of the Marcellus Shale drilling going ahead with test site drilling! This is a very uncertain and environmentally damaging process and I can't believe the state has the shortsightedness to NOT conduct more in-depth and thorough environmental reviews. It seems shabby and, frankly, corrupt to be so reckless with our precious natural resources. PA has a long and sad history of companies coming in and exploiting its resources. Maybe it's time for the state to take responsibility and protect them for future generations. Stand up now and do the right thing. Please!!

Sincerely,

Alastair Gordon
