Subject: 25 Pa Code Ch 78.

Get the fracking process under some kind of federal regulation (as poor performing as that usually is) I understand that Casey's FRAC ACT will close the so called "Halliburton Loophole". Let's get that done and and get this whole process under the Safe Water Drinking Act. This industry must be very tightly regulated with heavy ,heavy fines that make it economically punitive for any form of accident or abuse of the environment. Tust me they'll still make money.
