Subject: RE: Notice of Intent to Modify/Extend Plan approval #PA-30-00150A

Form Letter A 1-7

Dec 27, 2010

Secretary John Hangar

Dear Secretary Hangar,

I am writing to request that the Pennsylvania Department of Environmental Protection deny this plan approval extension. The original plan approval was granted in June of 2005, and in the 5.5 years since, Wellington has not ordered a single major component of this plant or done any significant construction despite the legal obligation to build the plant within set time periods. Therefore they should lose their immunity from new and better regulations that would protect Pennsylvania families from pollution, and begin the process again. This would better protect Pennsylvania's air and water quality.

For decades, residents of Greene and Fayette Counties in Southwestern Pennsylvania have had to live with the health effects caused by the Hatfield Ferry coal plant. The proposed Wellington coal plant is just a few miles away and the health effects of another neighboring coal plant would be detrimental to the health of these communities. Please help protect these communities by denying the extension of the Wellington construction permit.

We need to protect Pennsylvania's citizens from the pollution plants like Wellington would produce. Pennsylvania must move beyond the use of coal by expanding our use of renewable sources like wind and solar energy. By investing in clean, renewable energy and energy efficiency, Pennsylvania can begin a shift toward a cleaner, healthier, more secure future that would create thousands of jobs.

Sincerely,

John Farver
