Dear Judith Pachter Schulder,

This letter is in response to the proposed changes to the PA OT licensure. We believe that it is very important to continue our education for continued competency; however we feel we are already doing this by maintaining our OT certification. We are required to obtain 36 PDU's in a three year period to keep our certification, so why not make it mandatory for those who wish to have a license in PA that they must keep their certification up to date.

We feel that we may lose valuable therapists in the profession because many of the proposed activities are not readily available to many therapists. Please reconsider the proposed changes. Thank you for your time.
