Subject: Chapter 105 amendments-dam safety and water management

I support the EGB amendments to Chapter 105. The proliferation of water and wastewater impoundments for the natural gas industry requires more oversight which these fees will help provide.

The Environmental Quality Board (Board) proposes to amend Chapter 105 (relating to dam safety and waterway management). The amendments update existing fees and include additional fees for activities performed by the Department of Environmental Protection (Department).

This proposed rulemaking was adopted by the Board at its meeting of December 21, 2010.
