**Subject:** 25 PA. CODE CH. 105 -EQB Proposed Rulemaking

I am writing to affirm and support the EQB proposal to update 25 PA Code, Chapter 105 by increasing existing fees and including additional fees for activities performed by the Department of Environmental Protection with regards to the Dam Safety and Encroachments Act.

I am in complete agreement that the the current fees do not provide enough revenue to support existing program functions, especially as they pertain to the impoundment ponds used for gas drilling flowback fluids.

The health threats posed to PA citizens by unconventional gas drilling are, in my opinion, a time bomb with a long fuse.

Your efforts to increase oversight of this potentially dangerous activity by means of increased fees that will provide much-needed funds for the increased work load is applauded.

As a senior citizen of the Commonwealth who has worked in the field of health for over 3 decades, I am deeply concerned about the legacy the gas industry will leave future generations. Please continue to do all you can, including the approval of this 25 PA Code Chapter 105 proposed rulemaking.

Thank you.
