Subject: Proposed Dam Safety and Waterway Management Fees

RECEIVED
IRRC

2012 FEB 28 P 12: 34

Dear Environmental Quality Board,

As a chemist and retired chemical and environmental safety engineer, I completely support your proposed fees to support staffing needs which will help to protect the health and environment of PA residents. I am particularly concerned about impoundments for flowback fluids from the gas industry as they can outgas the various volatile organic chemicals which come up with the flowback water.

Thank you for this opportunity to comment,

Ted Stroter
