Dear Members Commissioners,

Tom Wolf has never seen a tax he didn't like. Even if it were as ludicrous as this one! Electricity is a necessity and and cost effective electricity is essential for the average person to afford. Now out of the 'other side of its mouth' government is pushing for electric cars! Pennsylvanians and America cannot afford this shear stupidity from its own government.

Pennsylvanians cannot afford increased energy costs and that is what entering the RGGI will mean because energy companies will pass the additional costs along to the consumer. The increase in electric bills alone will be about 18 percent. Pennsylvanians simply cannot afford this! The hardest hit will be low income families, those on fixed incomes and the elderly. Additionally, some power plants will be forced to close eliminating good paying jobs - jobs that families depend upon to survive. This is NOT a good idea and I urge you to reject Regulation #7-559 (IRRC #3274): C02 Budget Trading Program (RGGI).

Sincerely,

Dennis Adomaitis
