To whom it may concern:

As an 8th grader living in Pennsylvania, I fully support PA to join RGGI. I am writing this because I am really worried about the effects climate change will have on our earth and on our health. A place 8 miles from where I live has one of the highest asthma rates in the entire country. I am scared that as an adult in this state, I will not have clean air to breathe. That is why I believe that the big companies should be held accountable for all the damage they are doing, by joining RGGI, there will be less toxins in the air, a decrease sicknesses, and the money that is gained by taxing the pollutants will be put back into helping the climate.
