Subject: Oppose Proposed Regulation #7-559: CO2 Budget Trading Program

CAUTION: ****EXTERNAL SENDER**** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear IRRRC Regulatory Reform,

This will create more unemployment. Solar and wind will NEVER be enough to not have coal and gas power plants in PA. This will create major electrical issues.

As a small business owner, I strongly oppose Pennsylvania's entry into the Regional Greenhouse Gas Initiative (RGGI).

The COVID-19 pandemic has made it especially hard for small businesses to compete and succeed, and economic challenges will remain for the foreseeable future. There could be no worse time to burden businesses like mine with the higher energy costs that RGGI would bring to Pennsylvania.

I am also concerned about the thousands of jobs that will be lost when coal and natural gas-fueled power plants in the state are shuttered. Even more jobs would disappear in the communities surrounding them and the small businesses that support them, including manufacturing, transportation, raw materials, and vendor services. The ripple effect from these losses would impact the whole economy.

At a time when Pennsylvania's small businesses are suffering, RGGI would just set us further back. This seems especially irrational when modeling shows that RGGI will have little impact on CO2 emissions over time.

Please reconsider this course of action and withdraw this burdensome, anti-small business, carbon tax regulation!

Sincerely,

Amy Watt
