Dear members of the Independent Regulatory Review Commission,

I urge you to please join the Regional Greenhouse Gas Initiative on September 1st!

You may have seen the recent [UN Climate Report](#) which warn of a dire future especially if we dont take collective action to curb the amount of carbon going into the atmosphere.

This choice is often framed as a sacrifice, however, a carbon-free future will be cleaner and better than are fossil dependant present and past. Folks often lament how much it will "cost," however, maintaining the status quo will cost so much more in lives and suffering.

Going in a new direction takes inspiration and leadership. This is why you are commissioners on this body. Please take us into the future present and future generations need.

Thank you,
Milo
