I am writing as a Pennsylvania resident and voter to strongly urge approval of the RGGI rule. I am a senior citizen who is very worried about the negative impact of our current toxic air pollution on my health and life expectancy as well as the growing crisis of global warming. These negative impacts affect all of us and our families, including those of you who hold responsible leadership positions in our state government. I hope that, in making a determination on the RGGI rule, you will consider the health and environmental futures of all of us, yourselves and your families included, as the most important factor in your decision.

Thank you kindly in advance for your consideration of this request.
