Good morning,

To whom it may concern, I am a long-standing Pennsylvania resident writing to express my support for the RGGI rule making to reduce CO2 emissions. I am in my late nineties with children and grandchildren whom I would like to leave with a future of clean air so that they may have a happy life enjoying the planet as I did in my youth. I support the PA rule making to be discussed during the September 1st meeting. Now is the perfect opportunity to start PA on the path to regulatory control of emissions by adopting RGGI - which will in turn reduce instances of droughts, fires, and other detrimental impacts to our earth.

Thank you for your consideration.

Sincerely,

Ruth Sabey
