Please do NOT vote or encourage our legislators to participate in the RGGI. I do not believe that climate change is at all caused by human activity and do not believe it is bad. The climate has been changing since God formed the earth and to be a part of RGGI will do harm. Solar and wind blight millions of once pristine acres now, hurting pollinator and bird and animal life and are massive, hideous displays which will need maintained, scrapped, replaced, and the power generated needs transported from the wind and solar farms to the end users. Please consider the real, future ramifications of this green energy fiasco that seems to be such a feel good political issue. It is wrong and will do so much more harm than good. We have abundant resources in PA that need to be wisely and sensibly utilized. Please use wisdom and sense here

Thank you

Shanelle Hawk
