Here are my comments in support of RGGI for Pennsylvania.

To whom it may concern

The latest IPCC report that came out August 8th, 2021 is code red for humanity! Greenhouse-gas emissions from fossil-fuel burning are choking our planet and putting billions of people at immediate risk. To prevent the climate catastrophe from getting worse we need transformational action on clean energy. With RGGI we have a timely opportunity to cap the carbon pollution and make investment in clean energy, energy efficiency and green infrastructure. As a PA resident and a mother of two young children I urge IRCC to look at the environmental, health and economic benefits of joining RGGI so we can ensure a cleaner, healthier and sustainable future for our children and grandchildren.
