Comments entered:

Dear PA Environmental Quality Board,

It is time to stop destroying our environment for the purposes of the destruction of natural habitats. We are already in the throes of the sixth great extinction from a conservation perspective, and any additional destruction of habitat for the creatures we share the land with is a step in the wrong direction. Additionally, we need to protect the waterways in PA because what happens here impacts more than just our state. It has the potential of impacting the entire Chesapeake Bay watershed, third largest watershed in the world. We can no longer afford to take clean water for human use for granted.

I urge the Department of Environmental Protection to fully consider its mission to public health and the environment before finalizing its proposed revisions to Chapter 105, governing dams, water obstructions, and encroachments into aquatic resources.

The Department should reconsider its proposal to require a company seeking a permit for an industry activity that crosses multiple counties – like a pipeline – to submit only one application, rather than needing to go to each county the activity touches. This will make it harder for the counties and their residents to learn about proposed industrial activities that might affect their

waters and therefore make it harder for citizens to participate and have a voice in the process.

Second, the Department should also be revising these regulations to protect our wetlands and waterways and make it harder for industry to negatively impact them. Instead, the Department is making it easier for industry to get permits or evade the permitting process altogether by expanding the number of activities eligible for a waiver out of the permitting process. Because some Pennsylvania bodies of water are so important or threatened, there should be no waivers allowed for activities in these waterways, no matter how small the stream size. The Department should reduce, not expand, the number of waivers granted, and should not allow any waivers for activities impacting EV, HQ, Class A, wild trout, or already impaired streams.

Thank you for your consideration.

Sincerely,
