Comments entered:

Hi, I support stronger regulations that protect the freshwater resources in the state from future pipeline cuts, floodplain fill, dams and other harmful emerging proposed projects seeking to encroach and "do business" in these sensitive habitats where business doesn't belong. The quantity of our natural resources and the ecosystem services they provide for us and all living beings needs to grow, not diminish, especially with expected climate change over the next many decades. Less is more.

Thank you,
Boris
