Subject: The Pennsylvania Doctors of Naturopathy Regulation Act

This is a very poorly written law that does not confirm with the Constitutions and rules of law. It should either be rescinded or revised. What went on with COVID and the forced administration of vaccines, using the threat to rescind licenses and not allow individual medical practitioners as well as individuals to make their own decisions regarding their own safety and welfare, can cause the government to commit injury to We The People.

Add to this the cost of administration which, by one estimate is \$250,000. Let's say we have 25 naturopathic practitioners which meet the registration standards of 3,000 hours in Naturopathy and 1500 hours of internship. The cost of administration per practitioner is \$10,000, but even with 50 practitioner's it would be \$5,000. Due to the cost of administration, practitioners would either pass those costs on to their clients and/or the state would bear part of the administrative cost, or they would just cease providing these services.

Therefore it would be better to pass this cost to the organizations administering the exams and allow the public to utilize the registration of both naturopathic bodies and eliminate registration. Registration will only raise the cost of providing the public with this service and severely restrict the number of practitioners providing the service, primarily to one select group, while excluding other practitioners who have been providing naturopathic services for decades, but have received their training from other institutions.
